

Instructions on running the code: Group5

1. To run our code successfully, first, ensure you have installed all the libraries and methods we have used which you will find in the Jupiter notebook named “ml_code”
2. Open the folder named “Code_files” in your IDE. Inside the folder, there is the Jupyter notebook, which you can run all cells at once or cell-by-cell depending on your IDE
3. There is also the streamlit_app.py file in the folder. To run it, use “streamlit run streamlit_app.py” on your terminal on either Mac or Windows. Preferably, you can access the app on <http://40.40.1.41:8502>
